

As a resident of New Jersey, I urge you not to change the New Jersey Telephone Consumer Protection Act. At some point in time very soon I hope, the rights of the citizens must supersede those of business. This is supposed to be the government of the people, by the people and for the people, but it's not that way any longer. The people have very little to do with anything. The founding fathers must be turning over in their graves! When the people of New Jersey overwhelming signed up for this program, they sent a message to business. And that message should be honored. Power to the People!
